Latest version

## PERSONAL STATEMENT

---

Artificial Intelligence Researcher with 3+ years of experience in implementing, researching, and improving the latest reinforcement learning algorithms with deep-learning architectures using the industry standard tools, seeking a full-time data scientist role with an emphasis on applied research.

## EXPERIENCE

---

### Predoctoral Researcher

Sept. 2019 - Present

Artificial Intelligence and Machine Learning (AI-ML) Group, Universitat Pompeu Fabra *Barcelona, Spain*

I fulfill multiple roles in the lab besides running my own research project. The roles and corresponding responsibilities I hold can be summarized as the researcher, the lab technician, and the research manager. Some of my achievements in each of the roles I hold include:

- Development and maintenance of a reinforcement learning module in Python, which serves as the main research platform for the lab and shortens research iteration times considerably.
- Correlation and causation analysis, and modeling of motor and sensory signals of artificial robot arms.
- Development of a novel causal inference measure called Acceleration Transfer, and comparing it against Granger Causality and Transfer Entropy.
- Development of deep Q-network architectures using PyTorch to compare against classical planning algorithms in a policy generalization task.
- Concurrent management of multiple graduate students to advance a line of research leading to multiple publications to support an important research milestone.

### Research Assistant

Jun. 2018 - Sept. 2019

Artificial Intelligence and Machine Learning (AI-ML) Group, Universitat Pompeu Fabra *Barcelona, Spain*

Being the first research assistant to my advisor, I worked on multiple projects:

- Development and comparison of multiple deep-learning architectures with Tensorflow for Q-value estimation to understand the role of perception in artificial agent policy.
- Analyzing the effects of increasing the node size of small-world networks on Integrated Information measure ( $\phi$ ).
- Development of a multi-platform 3D robot theatre application using Unity 3D and C#, as a part of the robotic theatre project called Teatronika.

## EDUCATION

---

<b>Doctor of Philosophy in Information and Communications Technologies</b> Universitat Pompeu Fabra	2019 - 2023 <i>Barcelona, Spain</i>
<b>Master's Degree in Cognitive Systems and Interactive Media</b> Universitat Pompeu Fabra	2017 - 2019 <i>Barcelona, Spain</i>
<b>Bachelor's Degree in Psychology,</b> Maltepe University	2013 - 2017 <i>Istanbul, Turkey</i>
<b>Bachelor's Degree in Psychology,</b> The University of Sydney Minor in Bioethics	2009 - 2012 <i>Sydney, Australia</i>

## SKILLS & INTERESTS

---

**Technical Skills:** Python and standard ML modules including PyTorch, Tensorflow, Keras, Pandas, SciPy, NumPy, Sci-Kit Learn, Jupyter Notebooks, Matplotlib, Seaborn. R, SQL, Git, Unity 3D, and C# for Unity, LaTeX, Office, and Google Suite.

**Soft Skills:** Effective communication, presentation, and leadership skills developed by years of tutoring and academic advisory roles, remote working experience, volunteer work, various pieces of training, and living/studying in different countries.

**Languages:** English (C2), Turkish (C2), German (B2), Spanish (B1)

**Memberships:** Cognitive Science Society Member, Maltepe University Technology and Human Relationships Application and Research Center Advisory Board Member

**Interests and Hobbies:** Camping, scuba-diving, Krav Maga, Dungeons & Dragons, reading science fiction short stories
